

Improve Utilization. Maximize Efficiency.

Bio-Med Training

The **Mizuho OSI® Bio-Med Training Programs** are designed to ensure that Mizuho OSI products are properly maintained when serviced by the hospital Biomedical or Clinical Engineers. Our training program will provide your engineers with the knowledge required to ensure maximum utilization and return on your capital investment. Training includes in-depth operating theory, repair and maintenance procedures, and troubleshooting analysis. The program is hands-on and includes ample lab time working on the equipment.

Allegro®

Bio-Med Training

Mizuho OSI is pleased to offer Bio-Med Training to our customers. Our Instructor led courses are intended to give participants a thorough understanding of equipment their facility currently owns or will be purchasing. The course is also designed to provide hands on practice to comprehend the operations, preventative maintenance and component repairs needed to effectively maintain the equipment.

General Information

- Enrollment is on a first come basis and limited to six participants for a hands-on experience*
- Trainings conducted in our Union City, California training facility and lunch will be provided
- Travel and hotel accommodations are the responsibility of the trainee(s)
- Discount available for multi-training purchase
- Completion of training allows Biomed to service and repair table(s) for up to 3 years
- Online recertification available
